

QWEST EZ RATE

Simple. Flexible. Predictable.

Rates as low as \$.0191 per-minute for dedicated and \$.0327 per-minute for switched

Qwest® EZ Rate offers one rate for all in-state, state-to-state, and toll-free calls for switched and dedicated long-distance customers on either time division multiplexing (TDM) or Internet protocol (IP) platforms. Customers receive one aggressive rate per-minute based on locking into an estimated overall monthly long-distance spend level. If customers exceed their predicted usage level in a particular month, they continue to pay the same low monthly rate per-minute on the minutes that go over.

Customers may buy Qwest EZ Rate as a standalone offer or attach it to Qwest iQ™ Networking Internet Port, Digital Switched Service (DSS), or Primary Rate Interface (PRI) Service and receive additional discounts on their long distance.

Features and Benefits

- *Simple* – Easy all-inclusive rate structure (inbound, outbound, interstate, intrastate).
- *Flexible* – You have the ability to make changes to your tier up to four times a year.*
- *Predictable* – Set monthly rates ease cash flow management, every month you know what you are paying.

Qwest EZ Rate available on:

Qwest Total Advantage® • Qwest Total Advantage Express • Qwest Voice Advantage®

*Offer expires December 31, 2009. Some restrictions do apply.
Qwest reserves the right in its sole discretion to amend or change these rules and conditions at any time.*
