**TNCInet™ ADVANTAGE OFFERS ECONOMIC STIMULUS PACKAGE
FOR AGENTS AND CUSTOMERS**

**Private Network Nationwide DIA Services as Low as \$299
Target the SMB Customer**

The TNCInet™ Advantage portfolio now includes nationwide DIA service starting as low as \$299 for loop and port delivered over a private IP network. Customers can now satisfy their business-critical need for internet access and benefit from the Quality of Service and performance levels that characterize all TNCInet™ Advantage solutions. A wide range of internet bandwidths are available allowing Customers the flexibility to utilize a dynamically allocated circuit to layer on inexpensive voice applications immediately or at a later date. Additionally this solution brings the same high level of monitoring and management that are integral to the TNCInet™ private IP network. The TNCInet™ Advantage suite of products range from legacy support utilizing an IAD to an end-to-end SIP communications solution. The new TNCInet™ Advantage private network nationwide DIA services keep the price of entry low and the window of opportunity wide open.

TNCInet™ Advantage offers a cutting edge converged voice and IP communications suite that is delivered with a strong nationwide footprint, product offering and pricing.
